

# WELLHOUSE LEISURE CONVERSIONS

Over the last 4 years Wellhouse Leisure conversions have become synonymous with modern design and outstanding build quality. The fact that our vehicles have been tested in magazines such as "Which Motorcaravan", "MMM", "Camping Magazine" and "Motorcaravan Monthly" is testament to the way we do things at Wellhouse Leisure.

On the following pages are many pictures of the conversions we do, but as they say the proof is in the pudding and time after time people who visit us tell us that the workmanship of our conversions are far superior to ANYTHING ELSE they have seen.

The word conversion is like the word "car". The car could be a Ferrari but then again it could also be a Lada! They are both cars but very, very different and it's the same with conversions. Anyone can put in a hob and a sink and say, "it's a camper"! All we can say is take your time and compare our conversions with others, and then you can see for yourself the difference in quality.

**All our conversions are done in-house using only the finest quality components such as SMEV, Cramer, WAECO, Vohringer wood, Sony audio equipment, Yokohama tyres, TSW wheels, Hafele catches, Fiamma and Webasto diesel heaters**

## "Wellhouse Everywhere"

Rather than have other dealers, we have enlisted the help of our customers who are happy to show people the vehicle they have bought from us. These are mainly converted Mazda/Ford SGLs and Toyota Hiaces.

This is especially useful if for example a prospective customer lives in Scotland and doesn't relish the prospect of travelling hundreds of miles to view a vehicle he has never seen in the flesh before.

Please contact us if you would like us to put you in touch with the agent nearest to you.
